

FEATURES

- Adapts HD44 connector to 4 – RJ45 E&M ports
- Use with the 4 Port E&M Mini cards for the Loop AM3440, IP6704A, and G7800 chassis
- Easier cable connections
- Provides 4 RJ45 connectors per card
- Simplifies wiring

DESCRIPTION

These are accessory parts for the Loop quad port E&M mini card (QEMA). The QEMA mini-card can be used in the AM3440, IP6704A and G7800 chassis. The QEMA mini-card has a high density 44 pin D-style connector and ships with an HD44 to 4-RJ45 fan out cable with RJ45 male plugs on the cable ends.

These adapt the HD44 to 4 – RJ45 female jack connectors allowing for easy connection of RJ45 cables directly into the connectors with no RJ45 couplers or patch panels required.

When using multiples of these adapters with the AM3440 D and E chassis or the IP6704A you will need to use a combination of center bias with left or right bias adapters in adjacent slots.

Part #	Description
9502204	Centered HD44 to 4 port RJ45 adapter for 4 Port E&M Card
9502237	Right bias HD44 to 4 port RJ45 adapter for 4 Port E&M Card
9502238	Left bias HD44 to 4 port RJ45 adapter for 4 Port E&M Card

**RJ45
