

SA-1 Phone System Basic Amplifier

FEATURES

- **Ideal for telephone announcement**
- **600 ohm input**
- **4 watts into 8 ohm speakers**
- **Volume control**
- **120 or 240 volt AC power supplies**

DESCRIPTION

The DCB SA-1 is a 4-watt amplifier for 8 ohm speakers. The SA-1 connects to the announcement/paging output of a PBX or electronic key telephone system. The SA-1 provides impedance matching and amplification for PA type speakers. There are front panel indicators for power and to indicate that the receive voice channel is active. There is also a volume control for the speaker.

SPECIFICATIONS

Connectors:

- RJ-45
- 2-wire connector to connect to a speaker
